

Battery Cabinet

Practical and Convenient Enclosure for PV System Batteries

Beacon Power's newly designed **Battery Cabinet** is a simple, space-efficient way to house and protect your PV system's backup batteries, while providing expandability and ease of access.

The new **Battery Cabinet** from Beacon Power is the ideal complement to your Smart Power M5-series PV system.

Designed with the same elegance and simplicity that our inverters are known for, the **Battery Cabinet** features a dual-shelf configuration, removable top and front panels for ease of access, and a side-mounted optional breaker box.

For convenient expansion, two or more cabinets can be installed together as backup power requirements increase.

Designed to be rainproof, the **Battery Cabinet** is also available with an optional Zone 4 earthquake proofing kit.

Battery Cabinet Features and Specifications

- Dual-shelf configuration holds (8) Group 27/31 batteries
- Powder-coated steel finish
